Top Skills

Director level
IT Service Management
React Native

Certifications

Apache Spark and Scala Developer
Big Data and Hadoop Developer

Vaibhav Karkhanis

Executive Director, Software Development at Enfusion
Mumbai, Maharashtra, India

Summary

I'm a Senior Technology Leader with 20+ years of experience building and scaling engineering organizations across financial services, investment management, and fintech. My career has focused on solving complex business problems through strong architecture, digital transformation, and execution at global scale.

At ClearWater Analytics (formerly Enfusion), I built the India web and mobile engineering capability from the ground up — establishing trust with global leadership, expanding delivery ownership, and enabling India to contribute to over 80% of product development today. As part of the India Senior Leadership Team, I help shape the regional technology strategy across Mumbai, Noida, and Bengaluru, drive talent development, mentor leaders, and build a culture where teams feel empowered, innovative, and truly invested in the product.

Before this, I spent several years at Morgan Stanley and JP Morgan leading architecture and engineering efforts for mission-critical platforms. I continue to stay hands-on with technology, with strong experience in Java, Spring Boot, React, React Native, and modern database ecosystems. I enjoy designing scalable, resilient systems and working closely with enterprise architects to ensure alignment with long-term business and regulatory goals.

I'm currently deepening my expertise in AWS, Docker, and Kubernetes, and exploring how AI can enhance the web and mobile ecosystem — especially in areas like developer productivity, intelligent automation, and client experience.

I'm passionate about building high-performance teams, scaling global delivery, and creating an environment where people feel they work with you, not for you.

Experience

Enfusion (Now CWAN)
4 years 9 months
